Current Legal Use: Administrative Buildings for the Missionary Training Center (MTC) in the Training Facilities Zone (TF)

Relevant History: The MTC administration building and cafeteria were built in 1975

Neighborhood Issues: A neighborhood meeting was not held and there are no known issues at this time.

Summary of Key Issues:

- Two buildings will be demolished for this project. One building that houses administrative offices and the cafeteria and one building that is used for teaching.
- A new administration and cafeteria will be replacing those buildings.

Staff Recommendation:

Recommend Approval with the following conditions.

- All CRC comments are corrected and satisfactory to the departments.

OVERVIEW

The Provo Missionary Training Center (MTC) has a long history with the city. The first structures were built in 1976. The MTC is in the Training Facilities Zone (TF), which was established in 2013.

FINDINGS OF FACT

- The proposed project is in the Training Facilities (TF) Zone
- The gross square feet of the buildings being demolished is 208,735.
- The new buildings will have a total of 180,000 gross square feet.
- An additional 19,000 square feet of landscaping will be added.
- There are currently 555 parking spaces. That number will be reduced to 535.

ANALYSIS

The Provo Missionary Training Center (MTC) has been a longstanding institutional presence in the City of Provo since the original buildings were constructed in 1976. The property is located within the Training Facilities (TF) Zone, which was established in 2013, and the proposed redevelopment projects consistent with this zoning designation.

The project proposes the demolition of two buildings totaling 208,735 gross square feet. These structures will be replaced with new facilities totaling approximately 180,000 gross square feet, resulting in an overall reduction in building area. The redevelopment also includes the addition of approximately 19,000 square feet of new landscaping to enhance site aesthetics and functionality.

Parking on site will be slightly reduced from 555 existing spaces to 535 spaces. While we currently don't know the number of employees at the facility, Provo City Code 14.17C.130 (5) states "The parking ratio may take into account parking available on land outside of the zone if utilized by uses within the zone." There is a meeting house for The Church of Jesus Christ of Latter-Day Saints just to the north and has a connection to the MTC parking lot.

The proposed building heights comply with Provo City Code requirements in the Training Facilities Zone which limit building height to one-half ($\frac{1}{2}$) of the horizontal distance from the building to the nearest property boundary. The new cafeteria will be approximately 53 feet in height, and the new administration building will be approximately 87 feet in height.

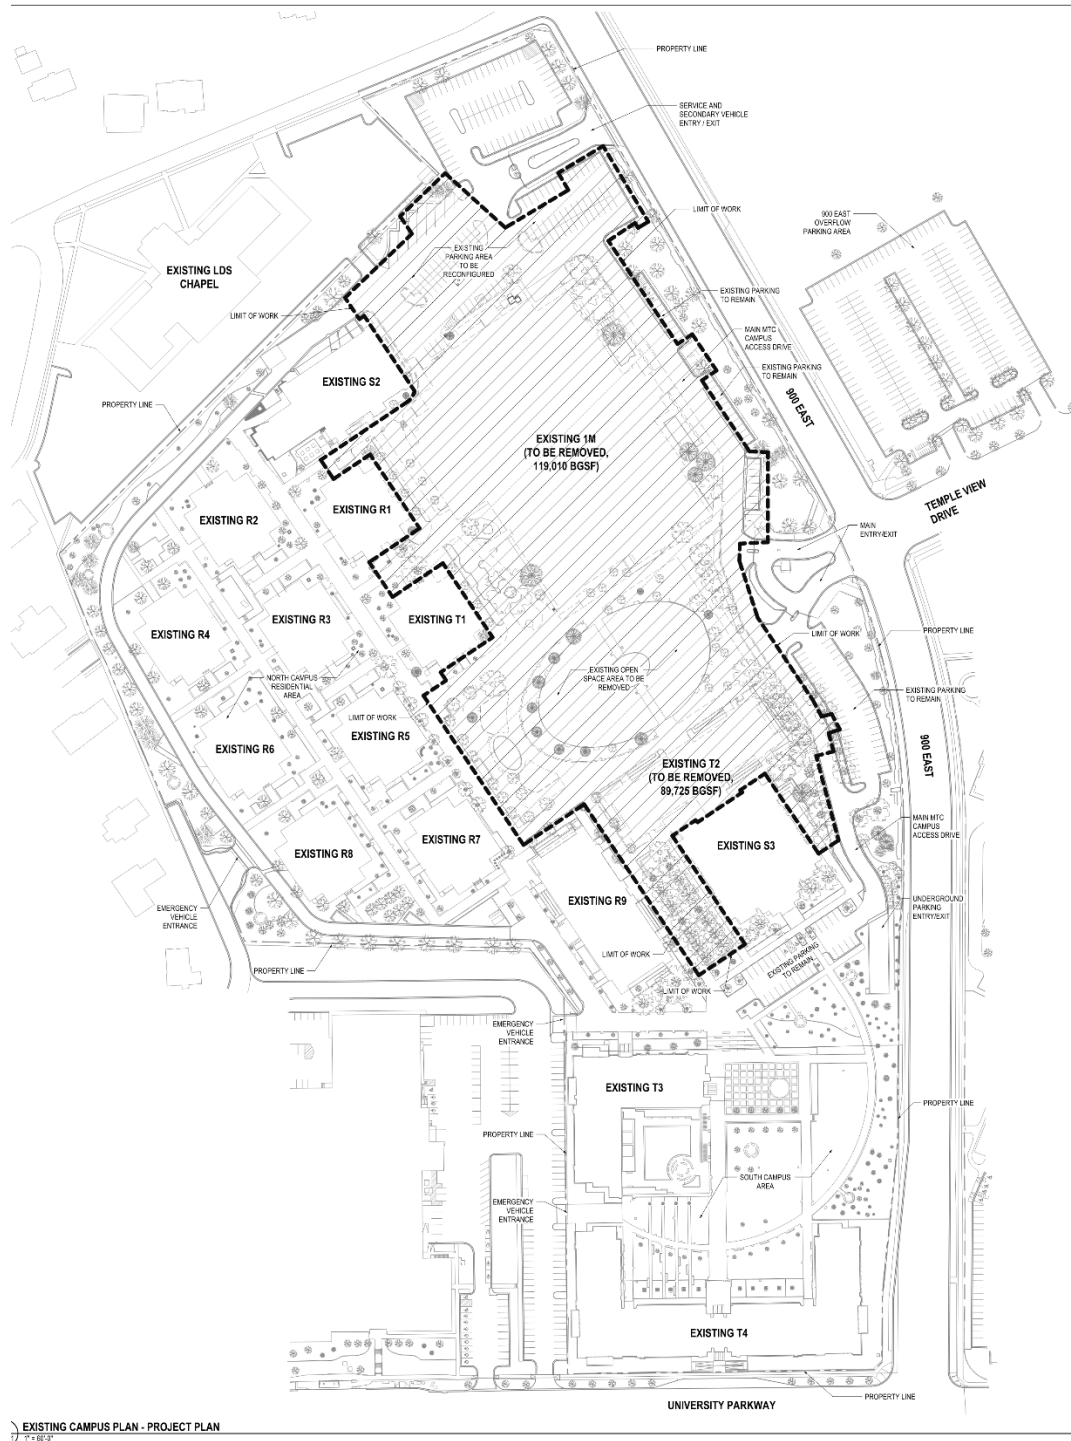

CONCLUSIONS

Staff have reviewed the Project Plan Proposal, and would recommend approval subject to the following conditions, that all CRC comments are corrected and satisfactory to the departments.
